

SILICON QUANTUM ELECTRONICS WORKSHOP 2026 &
INTERNATIONAL CONFERENCE ON SPIN SHUTTLING 2026

SiQEW 2026 & ICOSS 2026

August 31 – September 2 | September 3
Songdo Convensia, Incheon, Korea

Exhibitor Introduction

Company Name	SemiQon	Company Logo
Address	Tietotie 3, 02150 Espoo, Finland	
President	CEO, Himadri Majumdar	
Website	www.semiqon.com	
E-mail	info@semiqon.tech	
Telephone	+358105710910	
Fax		
Exhibitor Introduction	SemiQon’s mission is to realize the promise of quantum computing by delivering scalability through powerful, resilient, and cost-effective silicon-based quantum hardware. Its technology builds upon decades of development and know-how from the semiconductor industry, making its cryo-optimized CMOS electronics commercially competitive and well-suited for mass-manufacturing. SemiQon’s first-in-the-world cryo-optimized CMOS delivers scalability and power efficiency to wide-ranging applications in quantum, space, and beyond.	
Exhibit Description	Come meet the SemiQon team at SiQEW to see our latest developments live and learn more about our cryo-optimized CMOS.	
Exhibit Product	SemiQon’s cryo-optimized CMOS electronics are available as RF switches, multiplexers, de-multiplexers, amplifiers and memory elements. SemiQon cryo-CMOS is a modality-agnostic platform compatible with all major qubit technologies.
