

SiQEW 2026 & ICOSS 2026

August 31 – September 2 | September 3
Songdo Convensia, Incheon, Korea

Exhibitor Introduction

Company Name	Sensorview Co., Ltd.	Company Logo
Address	792 Dongbu daero, Dongtan-gu, Hwaseong-si, Gyeonggi-do	
President	Byeong nam Kim (Klaus)	
Website	www.sensor-view.com	
E-mail	sales@sensor-view.com	
Telephone	(+82) 02-2038-7765	
Fax	(+82) 02-2038-7764	
Exhibitor Introduction	SENSORVIEW is a KOSDAQ-listed Korean RF technology company specializing in high-performance cables, connectors, antennas, AEC cables, and integrated RF solutions. Based on proprietary low-loss materials, precision high-frequency design, and in-house manufacturing capabilities up to 110 GHz, we serve telecommunications, AI data centers, test and measurement, semiconductor, aerospace, defense, satellite, and quantum computing markets. SENSORVIEW has built a proven global sales track record through vendor registration and product supply to leading companies including Qualcomm, Keysight, Google, Samsung Electronics, and other major technology customers. With subsidiaries in the United States, Taiwan, and Germany, we provide local sales and technical support for global customers and customized projects.	
Exhibit Description	SENSORVIEW is also expanding into the quantum computing market with cryogenic RF solutions. We develop cryogenic RF cables, cable assemblies, and interconnect solutions designed for quantum computing systems, leveraging our expertise in high-frequency, low-loss RF connectivity.	
Exhibit Product	● Cryogenic RF Cable Assemblies NbTi, CuNi, and SCuNi-based cable assemblies in 0.034", 0.048", and 0.085" sizes for RF signal transmission in cryogenic environments. ● High-Density Cryogenic Cable Assemblies Multi-channel cable assemblies, including 12-channel and 24-channel configurations, designed for compact and high-density quantum computing systems. ● Cryogenic Connectors & Adapters RF connectors and adapters designed for reliable operation in ultra-low-temperature environments.
